ht Libero SPA

ht Libero SPA

Libero is a cloud-based system for wellness and spa centers or sports facilities. It works well as a stand-alone system or can be used together with **HotelTime PMS**. It brings several advantages such as sharing of the guest database between the systems or the ability to charge the used services (wellness/spa/sport) to the hotel guests' accounts.

Advantages:

- More effective and increased sales

- Integrated with HotelTime PMS

- Increased work efficiency

- Quick system implementation and easy staff training

- Cloud-based system available from anywhere

Increase in sales by up to 30%

Saving tens of hours
of manual work/month

More effective and increased sales

Libero supports simple sale of services. Guests can purchase and/or reserve services themselves (they choose a specific time/place/person) through a website of a concrete provider.
The system also supports the sale of gift-vouchers and payments that can be made with them.

It is also possible to pay in other ways, e.g. by card, and when connected to **HotelTime PMS**, the bills can be charged to the guest's hotel account.

Integrated with HotelTime PMS

The Libero SPA system is connected with **HotelTime PMS**. When using both software, it is not necessary to make spa/wellness reservations only at the spa/wellness reception. The reservation system is also accessible at the hotel reception or is accessible to guests themselves.

Information about guests is shared between systems. It is also possible to charge spa/wellness bills to the guests' hotel accounts directly from the **Libero** system. It is not necessary to enter them manually.

Increased work efficiency

The software makes the staff more efficient thanks to the possibilities of accurate planning of visits to wellness/spa/sports facilities as well as very helpful and easy planning of staff shifts.

Quick system implementation and easy staff training

The software implementation in the hotel is carried out by a highly qualified team of professionals with many years of experience in the hotel industry and hotel operations.

The implementation process is fast and efficient, and we emphasize a personal approach.

The subsequent training of the staff also takes place quickly. The team can work with the system after a few hours of training. The implementation and training of personnel are adapted to the needs of a specific operation.
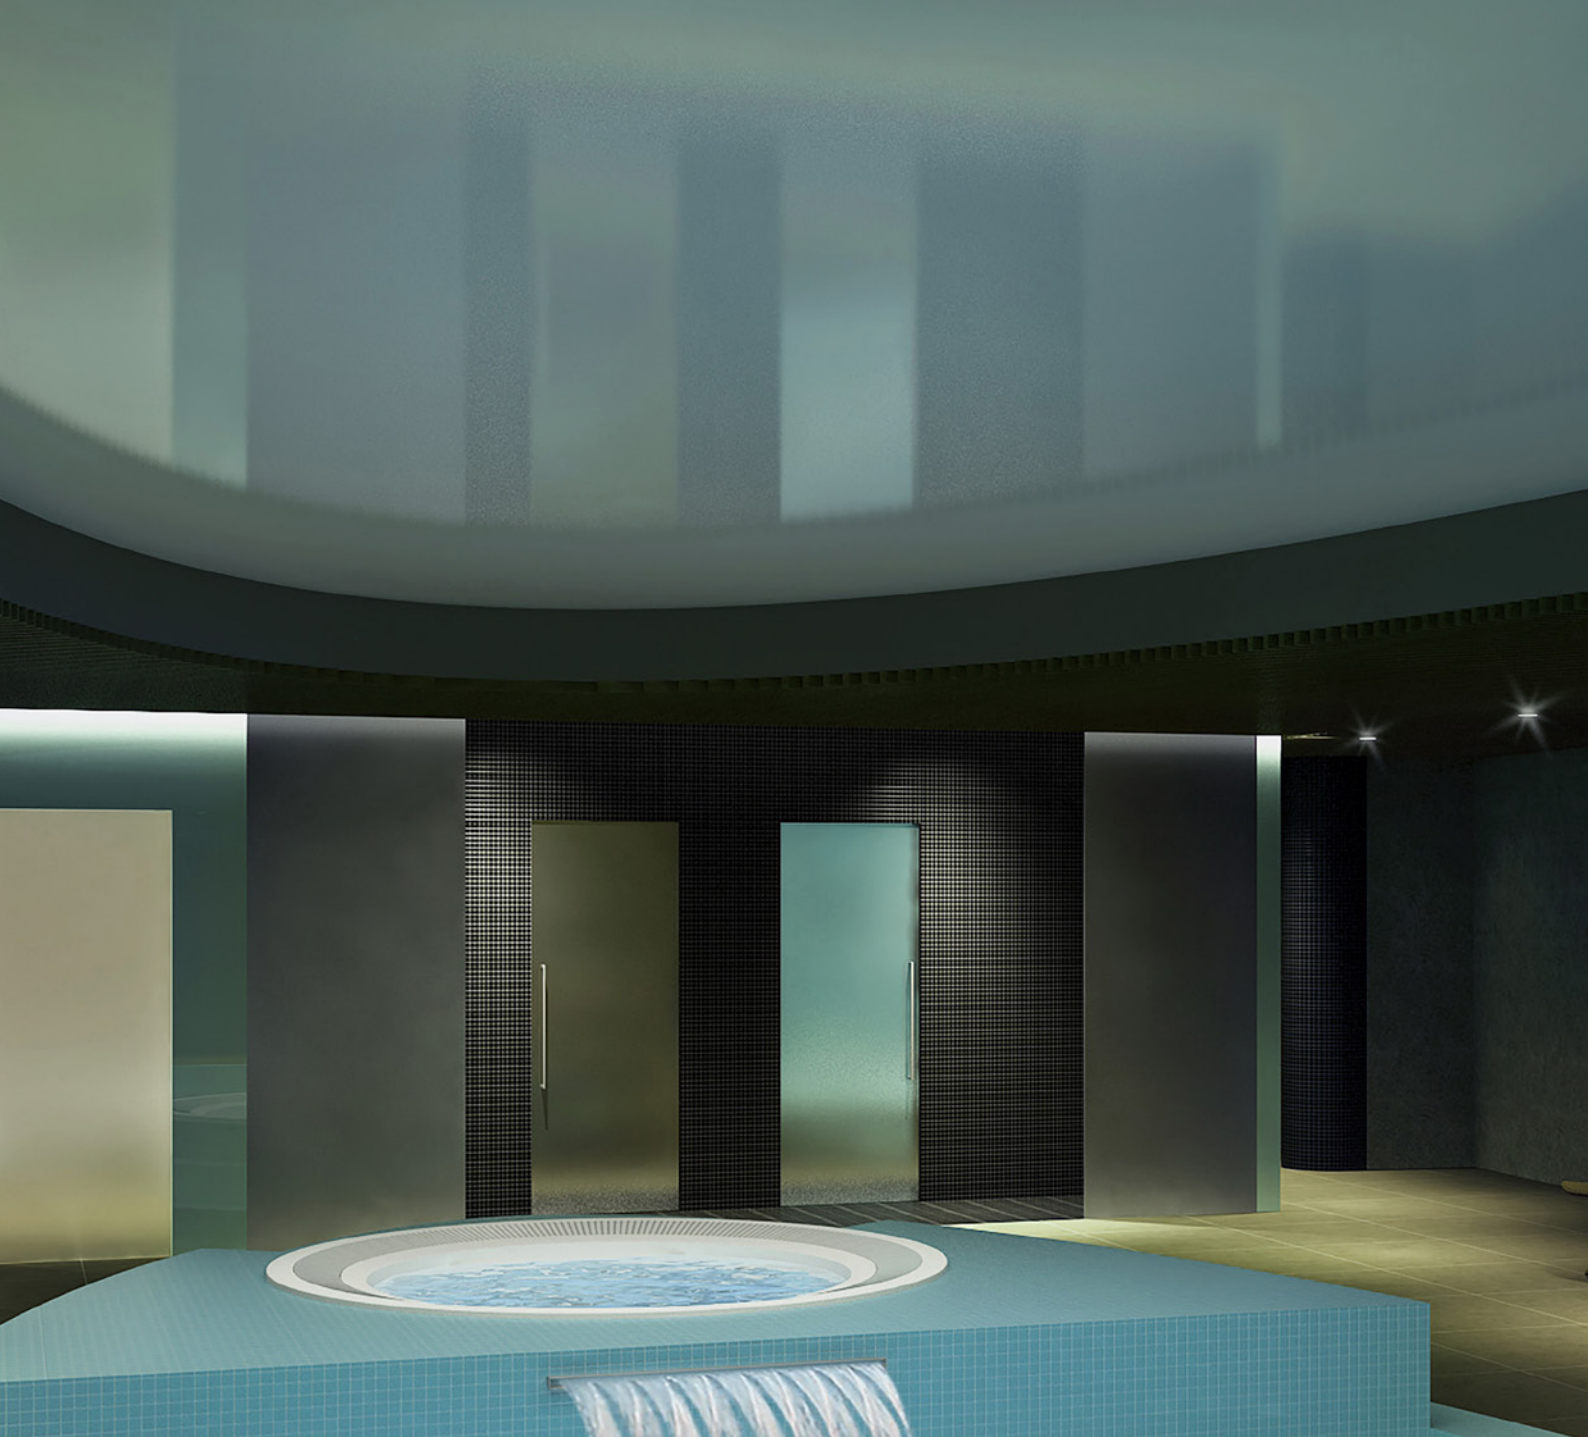

Cloud-based system available from anywhere

Libero is a cloud-based system accessible through any web browser on any 'smart' device. It is user-friendly and can be easily adapted to the needs of a particular operation.

Furthermore, **Libero** allows management to view data about an operation on any device, even remotely from anywhere.
