ht Vento POS

Vento POS

Vento POS is a cloud-based system that facilitates the operation of restaurants, wine bars, and other procedures. It is suitable for F&B departments of hotels, and independent businesses but also for those with multiple branches.

Advantages:

- Efficient and easy operation management

- Saves hotel expenses

- Cloud-based system available from anywhere

- Integrated with HotelTime PMS

- Fast service and easy and directly accessible ordering for guests thanks to the Vento QR module

- Easy staff training

- Noticeable acceleration of inventories

- Less error rate during inventories

Infinite amount of warehouses
and food/beverages

Personnel able to work with
the system after only 2 hours
of training

Efficient and easy operation management

HotelTime Vento POS enables efficient and easy management of restaurant operations
management thanks to detailed reporting, which complies with the most demanding
financial audit requirements, thanks to tools for efficient warehouse management
or pricing tools.

Saves hotel expenses

As **Vento POS** is cloud-based software, it does not require a hotel to run its own servers
or have an IT department. In addition, regular updates of HotelTime PMS are free of charge.

## Cloud-based system available from anywhere

Vento POS is accessible through any web browser on any 'smart' device.
It is user-friendly and can be easily adapted to the needs of a particular operation.
Vento allows management to view data about processes on any device, even remotely from anywhere.

In addition, the Vento enables flexible and easy removal of devices (cash registers) and their addition, e.g. in case of malfunction.

Integrated with HotelTime PMS

Vento POS can work either as a stand-alone system or can be used together with **HotelTime PMS**. The integration of these two systems enables a flawless exchange of information between them, which means,

for example, the possibility of charging a guests' expenses from a restaurant to their hotel accounts or the possibility of transferring sales information from Vento to **HotelTime** management reports.

Fast service and easy and directly accessible ordering for guests thanks to the Vento QR module

Vento QR is a module developed by **HotelTime** Solutions that allows guests to independently order and pay for orders and waiters to be mobile and receive orders on any device through simple QR code.

Quick system implementation and easy staff training

The software implementation in the hotel is carried out by a highly qualified team of professionals with many years of experience in the hotel industry and hotel operations. The implementation process is fast and efficient, and we emphasize a personal approach.

The subsequent training of the staff also takes place quickly. The team can work with the system after a few hours of training. The implementation and training of personnel are adapted to the needs of a specific operation.
